

## Потенциальный размер СВАМ выплат России может достигнуть ~5 млрд. долларов к 2030 г. при сохранении структуры отраслей, облагаемых сбором

Структура российского экспорта может существенно измениться в связи с ускорением энергоперехода в ЕС и падением спроса на отдельные товарные категории с высоким углеродным следом (напр. ДВС, энергоресурсы)

В первые годы размер СВАМ будет ниже расчётного на сумму, пропорциональную бесплатных квот в рамках ЕТС ЕС в каждой из отраслей<sup>3</sup>

<sup>1.</sup> Расчет проведен на основе текущих значений и прогнозов МЭР по каждой облагаемой сбором отрасли; 2. Цена, необходимая для достижения углеродной нейтральности экономики на основе прогноза Международного Энергетического Агентства (EIA Net Zero by 2050); 3. Расчёт не включает корректировку СВАМ по размеру бесплатных квот ETC EC, т.к. не разработан механизм и нет решения о размерах бесплатных квот по отраслям в 2026 г.
