

BCG Voluntary Carbon Market Disclosures

BCG commits to comply with California's Voluntary Carbon Market Disclosures Act (AB 1305). Claims linked to BCG's net zero program, including carbon neutral company certification, are verified for accuracy by an independent third-party as outlined in the latest sustainability report. BCG purchases voluntary carbon offsets sold within California, and discloses the pertaining entity, project, carbon offset, protocol, and verification information in the table below.

For detailed information about BCG's net zero strategy including interim progress, please refer to the "BCG's Own Commitment to Net Zero and Environmental Sustainability" section of our latest [sustainability report](#). Additional information can be found on our [net zero page](#), and the latest net zero anniversary article found in the same location.

Business Entity selling credits	Offset Registry	Project Identification number	Project Name	Offset Type	Protocol Implemented	3 rd party verification of claims listed
