About BCG

Boston Consulting Group partners with leaders in business and society to tackle their most important challenges and capture their greatest opportunities. BCG was the pioneer in business strategy when it was founded in 1963. Today, we help clients with total transformation—inspiring complex change, enabling organizations to grow, building competitive advantage and driving bottom-line impact. To succeed, organizations must blend digital and human capabilities. Our diverse, global teams bring deep industry and functional expertise and a range of perspectives to spark change. BCG delivers solutions through leading-edge management consulting along with technology and design, corporate and digital ventures—and business purpose. We work in a uniquely collaborative model across the firm and throughout all levels of the client organization, generating results that allow our clients to thrive.

About RAI

Retailers Association of India (RAI) is the unified voice of retailers in India. A not for profit organization, RAI, works with various stakeholders to create the right environment for the growth of modern retail in India. It represents an entire gamut of retailers, from chain store retailers and department stores to independent emerging retailers. RAI encourages, develops, facilitates and supports retailers to modernize and adopt best practices. It works with all levels of the government and stakeholders to drive employment opportunities, promote retail investments, drive thought leadership, enhance customer choice and build industry competitiveness.

Foreward

India had witnessed steady consumption growth for many years driven by strong socio-demographic drivers and an enabling environment. Understandably, the COVID-19 pandemic dealt a significant blow to the economy and had widespread ramifications on consumption patterns. However, consumption had made a recovery and the changing landscape is engendering myriad opportunities for Indian retailers.

Changing consumer preference coupled with emerging trends like ‘seamless’ retail, next-gen stores, personalization, the rise of mega ecosystems, and emerging revenue models are likely to shape the retail landscape in India. Our insights suggest that while some of the preference shifts are short term in nature, several others are likely to have long-term implications for the supply side. Recognizing these trends and responding to them proactively and in an agile manner can help retailers create a winning strategy for the coming decade.

This report “Racing towards the next wave of Retail in India”, jointly developed by BCG and RAI, details the opportunities for retail in India while underscoring innovative practices adopted by global retailers and the key emerging trends. The report also shares critical imperatives for the Indian retailers to succeed in the next year, and the next decade. Further, we lay out some interesting actions undertaken by global retailers to take advantage of the context.

We hope you find this report informative and useful for your business.
Contents

01  Retail in India remains an exciting opportunity

02  How retailers continue to push boundaries of retail

03  Key imperatives for Indian retailers to succeed
Executive Summary

The India consumption story, the seeds of which were sowed more than three decades back, continues to remain stable despite unprecedented challenges. India’s consumption has been showing a steady and strong double-digit growth and, despite COVID impact in 2020, has bounced back. Few factors that have been driving this consumption growth include 1) Increasing household income, 2) Access to avenues of consumption like malls, shopping complexes, multiplexes etc., 3) Increasing internet penetration, and 4) Improving consumer confidence.

Today, online channels have taken centre stage and are now generating a significantly larger share of revenue across segments for organized players. However, we believe that COVID had dramatically accelerated the growth and it is expected to stabilise. We expect India’s Retail Industry to continue to grow at 9–10% to reach approximately $2 Tn by 2032, a growth trajectory that remains intact, although delayed by ~2 years due to the pandemic.

Shapeshifting retail landscape

While growth remains intact, the shape of this growth is currently in a state of flux. Over the last two years, consumer preferences, behaviors, and attitudes have changed precipitated by the COVID-19 pandemic. That has deep ramifications on how people can buy and consume goods and services. Inevitably, this engendered myriad challenges and opportunities for global retailers, many of whom are adopting innovative models to harness emerging opportunities in retail. Globally, five major emerging trends are being observed that are shaping the future of retail. These are:

‘Seamless’ retail: Consumers no longer see boundaries between online and offline channels of consumption. This has led global players to experiment ways to create seamless retail experiences that are integrated across all channels.

Emerging revenue models: Retailers are experimenting with revenue models to enhance their customer value proposition, by leveraging both traditional methods and emerging e-commerce models.

Rise of mega ecosystems: Rising competition and the need to constantly improve the customer value proposition is driving the rise of mega ecosystems, through acquisitions, partnerships, etc. which benefit both the shoppers and the retail partners.

Personalization at the core: Availability of quality data and the willingness of customers to share the same has enabled retailers across the world to deliver unique customer experiences.

Next-gen stores: Brands are experimenting new approaches to connect with shoppers, through in-store experiential concepts and using technology for blending digital content and the environment.
Harnessing the ‘BIG’ retail opportunity

While there are multiple opportunities for Indian retailers, action needs to be taken on multiple fronts in order to achieve sustainable and profitable growth. The first step in that direction is to recognise that currently there is an interplay of several factors that are likely to shape the contours of retail in India. There may be changes in consumer behavior due to evolving preferences, for example, convenience vs. gradual rise in sustainability, or hyper-personalization versus rising concerns around data and privacy. Some of the other changes such as preference for renting over owning or shift towards experiences and brand affinity could go up or down, as witnessed in global markets. Many of these are likely to be transitory in nature and have minimal to short-term impact. There are other factors that could be more enduring in nature and could truly disrupt the retail landscape in India. These could include the launch of Open Networks for digital commerce, leveraging core consumer data to create offerings beyond retail, identifying supply side innovations that could create value, etc. As these factors play out, it will translate into choices that retailers will need to make either with respect to their core consumer proposition or backend operations.

Critical imperatives for winning in the future

Based on BCG’s learnings globally, there are multiple themes that could play out/gain prominence over the next 5 to 10 years. While some themes on consumer proposition such as convenience and experiential retail are already visible in India, emerging themes such as responsible and alternate retail could gain scale. Irrespective of the choice set, there are some “critical imperatives” to win in the next decade. These include improving the customer experience, Building an agile organization, improving cost efficiency, developing partnerships and ecosystems, etc.

Retail in India is growing at a strong clip and creating new opportunities for retailers. However, the changing landscape demands retailers to be receptive to change and more agile in response to shifting consumer preferences. We hope that this report will serve as an inspiration and a call to action for retailers determined to stay ahead of the curve and create a winning strategy for the coming decade.
Chapter 01:
Retail in India remains an exciting opportunity
Chapter 01: Retail in India remains an exciting opportunity
The India consumption story continues to remain strong despite unprecedented challenges

Household consumption grew significantly to INR 130-140 Tn in 2021

Private Household Consumption (INR Tn)

1. Total household consumption is in nominal value.
Source: CMIE Data
India’s consumption has shown steady and strong double-digit growth pre-pandemic. Despite slight dip in 2020, consumption bounced back in 2021 to grow beyond pre-pandemic levels.
Strong fundamentals in place to drive consumption growth

Factors driving consumption...

**AFFLUENCE**
- Household income is on the rise
- Increasing share of Affluent + Elite

**ACCESSIBILITY**
- Access to avenues of consumption like malls, shopping complexes, multiplexes etc
- Increased information availability through online & offline media

**AWARENESS**
- Positive outlook towards prospects
- Propensity to increase spends

**ATTITUDE**
- Tendency to shop anywhere, anytime
- Increasing discretionary expenses
1. Consumer Confidence Index as reported bi-monthly by RBI

...are robust

**AFFLUENCE**
40%
Increase in annual household income expected by 2030

**ACCESSIBILITY**
~120 Cr
Users expected to have a smartphone by 2026

Racing towards the next wave of Retail in India
Chapter 02: How retailers continue to push the boundaries of retail
Global retail players have been facing unprecedented challenges for the past 2 years.

Global trends with significant influence on retail:

**Macro-Economic Trends**
- COVID-19
  - Store closures
  - Depressed Demand
  - Health & Safety
  - Operations & Supply chain issues
- Climate change
- Urbanization

**Political Influencers**
- Trade wars
- Rising wages
- Off-shoring and outsourcing

**Data and Identity**
- Cybersecurity & identity theft
- Modern payments
- Advanced analytics

**Digitization**
- Rise of platform companies
- Automation (AI, robotics)
- Virtual / Augmented Reality

Racing towards the next wave of Retail in India
Changing Demographics
+ Population growth and diversity
+ Ageing population, longevity
+ New consumers (Gen Z & Millennials)
+ Changing workforce profile

Global Connectivity
+ Global platforms and ecosystems
+ Impact of tech giants
+ Internet of Things (IoT) and Voice Technology
+ Sharing economy

Human Aspirations & Behaviors
+ Changing mindsets regarding assets vs. experiences
+ Increased service expectations
+ Convenience / time-compression
+ Trading up / down
+ Health & wellness

Brands & Product
+ Commoditization / product transparency
+ Proliferation of brands (including DTC)
+ Exclusivity

NON-EXHAUSTIVE
5 emerging global retail trends shaping the future of retail

**01**

"SEAMLESS" RETAIL

Consumers don't see boundaries between online & offline channels

Need for creating seamless retail experiences, that are integrated across channels

**02**

EMERGING REVENUE MODELS

Experimenting with new models to enhance revenue

Innovative ways emerging for selling products on social platforms

**03**

RISE OF MEGA ECOSYSTEMS

Move to build platforms & ecosystems that serve all customer needs

Alliances add and scale retail capabilities, stave off competition
04 PERSONALIZATION AT THE CORE
More and better quality data available, in context of privacy / security
Consumers seek unique and tailored offerings, from discovery to fulfilment

05 NEXT-GENERATION STORES
Greater shift in consumer spending to online / other viable channels
Retailers evolving their store’s format and purpose to add more value to customers
"Seamless" Retail | Consumers want shopping to be a seamless experience

- **Physical In-Store**
  - New Collection in a print advertisement

- **Digital In-Store**
  - Customer uses tablet to see selection online
  - Sales associate uses a tablet to show additional accessories

- **Digital Out-of-Store**
  - Customer uses smartphone to complete purchase online

- **Physical Out-of-Store**
  - At home, customer receives the order next-day

**INTEGRATED CHANNELS**

**Inspire**
- In-Store Touch & Feel

**Assist**
- Furnishing advice from in-store personnel

**Sell**
- Sales associate uses a tablet to show additional accessories

**Support**
- Customer uses smartphone to complete purchase online
Behavior is moving towards an ‘anything, anytime, anywhere’ expectation

I can buy everything ... 

At home, via IoT
While commuting, via shoppable wall
On mobile, direct from recipes

... delivered anywhere ...

Home Delivery
Delivery to Car
Click & Collect

... at a moment's notice

One-Hour Delivery
Repeated Delivery (Subscription)
Made-on-Demand
A US based global e-commerce player has fully integrated their offline stores with the online offerings to offer a seamless grocery shopping experience.

- Customers can save time by **ordering ahead** custom prepared foods (such as deli cuts) via the app.
- **AI voice assistant** helps customers manage shopping lists and navigate the store's aisles.
- Check out is **completely automated with no human intervention** – amount auto deducted from digital wallet.
- Shoppers can use **Automated Cart** – need to drop items in the cart and is auto detected.
A Chinese grocery player offers 'O2O'- Online-to-Offline stores that gives consumers a “more efficient and flexible” shopping experience.

Shoppers use the app as a resource for information such as source of product origin, recipe recommendations.

Shoppers scan their phone to pay with digital wallet – for fully automated cashier less checkouts.

Shoppers select and add items to the physical cart – then digitally request for home delivery and drop the carts on a conveyor belt.

Shoppers simply add products to a digital cart by scanning the product’s QR code.
Emerging Revenue Models | Retailers are experimenting with new revenue models while enhancing their customer value proposition

Retailers are adopting traditional methods to diversify their offerings

Extension of Core Retail

+ Using new revenue streams for existing product line like Product Rentals and Paid Memberships

Retail as a Service

+ Providing services to complementary 3rd party sellers like - Advertising Services and Marketplace Hosting
There is an emergence of many e-commerce models, unlocking new customers for retailers

**VIDEO / LIVE**

Using livestream / pre-recorded videos to drive customer purchase journeys:

+ Generating interest through short videos
+ Using live video to share product details
+ Answering customer queries in real time

**INFLUENCER LED**

+ Leverages "Key Opinion Leaders (KOLs)" who have a steady following, to endorse/ review the brand’s products or services
+ An influencer might demonstrate certain hacks of the products, explain its pros and cons, etc

**RESELLER LED**

+ Marketplace using resellers to sell a curated set of products in their circle
+ Consumers trust the recommendation of the reseller for product quality and prices
+ Supplier holds inventory & 3rd PL fulfills delivery to the customer
An Asian social shopping platform enables businesses to **leverage livestreaming and short videos for e-commerce**

**Livestreaming purchase journey on the platform**

- **Discover**
  - Short videos uploaded to trigger interest

- **Interest**
  - Livestream provides 360-degree product demo and option of Q&A

- **Purchase**
  - Customers can purchase the product on the same online platform

**3 Key levers determine campaign success**

- **KOL (Key Opinion Leader) Management:**
  - Leveraging a range of opinion leaders (Leading influencers, category leaders, in-house experts)
  - External influencers to drive traffic

- **Portfolio Management:**
  - Selection of suitable product for KOL's video e.g., Expensive new SKU shall be driven by leading influencer, etc.

- **Content Management:**
  - Content must be tailored to maximize marketing effectiveness for the specific product

**Source:** Expert interview, BCG analysis

---

**Racing towards the next wave of Retail in India**

---
A Chinese community-based e-commerce platform allows users to check product reviews by users and purchase.

Company started as a social platform to share product reviews, but is now a popular influencer marketing platform which enables customers to buy recommended products and share product reviews.

- Users can follow user/brand accounts to see trending content.
- Users share detailed product reviews; other users can share/comment.
- Integrated e-commerce platform; users can purchase items in the app.

A social community for female customers to share shopping experience and product reviews.

1. Search the product you're interested in.
2. Read the photos & texts to do research.
3. Compare and select the promotion offers.
4. Click to purchase.
5. Add to shopping cart or buy instantly.
6. Browse hundreds of notes & deep dive the one you like.

Chapter 02: How retailers continue to push the boundaries of retail
A Latin American platform gives businesses the access to resellers, who leverage their existing connections to acquire customers.

**Benefits for retailers, resellers & customers**

Customers benefit in two ways:

- Get access to high-quality products at affordable prices that are difficult to find elsewhere, as platform works directly with manufacturers/big distributors.
- Social recommendation solves for “Trust Deficit”

Resellers, who are mostly women, earn high commissions without incurring inventory risk.

Manufacturers benefit by being able to tap into an army of highly-networked salespeople—an extremely attractive proposition.
Rise of Mega Ecosystems | Leads to benefit for shoppers and retail partners

4 Key drivers fueling the rise of ecosystems

01. Access a broad set of capabilities & resources, while competing on core strengths

02. Scale quickly, before competitors mobilize

03. Remain competitive by lowering the cost to compete

04. Provide an improved value proposition to customers, through more services/products under one platform

Source: BCG Henderson Institute
Chapter 02: How retailers continue to push the boundaries of retail

... the value proposition improves as additional complementary partners join the ecosystem

FLYWHEEL 01
Network Effects

FLYWHEEL 03
Economies of Scale

More & Richer Data

More Users

More Partners

Spreading Fixed Costs

Deeper & Better Insights

Improved Value Proposition

Lowering Unit Cost
Platform giants seeing rapid growth by building ecosystem through acquisitions and partnerships
Company’s ecosystem strategy

**Strengthening Consumer & Retail Core:**

+ Example: Acquired stake in Chinese retail with hypermarkets to gain & control offline touchpoints.

**Building adjacent B2B services to create additional value.**

+ Example: Acquired a Chinese logistics company to enable seamless online & offline retail experience.

**Developing technologies to enable businesses in the ecosystem**

+ Example: Building capabilities to provide cloud computing services to ecosystem partners.
Personalization at the core | Personalization across all channels is the next big opportunity

What does it mean?

Providing every shopper with a unique journey across every single touchpoint and channel

Customers
Get a curated, concierge experience

Companies
Engage with individuals rather than just segments

Key factors driving the personalization wave globally

Differentiation
Hyper-personalisation provides key differentiation opportunity for retailers

Customer Expectations
Customers are now expecting personalized, convenient, and customised solutions and experiences

Data Abundance
Availability of quality data, a pre-requisite for creating a personalized customer experiences, has exploded in the past

Tools & Tech-Enablement
Technology to deploy personalization is now becoming a reality across retail touchpoints
Chapter 02: How retailers continue to push the boundaries of retail

Impact on Business

10%+
Incremental revenue

40%+
Increase in average order value

20%+
Increase in NPS score

.. reported by companies that used advanced personalization methods
Retailers across the world are using **personalization** to deliver superior customer experiences.

A US based global coffee player built loyalty through personalized offerings and rewards program.

A custom-built technology platform to drive personalisation:

- Created customer DNA using purchase history & predicted propensity
- Built integrated personalization AI engine, enabling personalized contextual recommendations
Personalization drove significant impact in terms of revenue & engagement

>3x
Incremental revenue per redeemer per year, totaling +$250M

3x
Improvement in campaign results run rate

150%
Increase in marketing engagement
# Next-Gen Stores: Retailers are evolving their store's format driven by consumer shifts, tech innovation and disruptors

Multiple factors are influencing the Physical Store Format

<table>

---

**Strong track record of double-digit historical growth**

**Potential for large players to consolidate market share**
Interplay of several factors will shape the contours of retail in India

**CHANGE IN CUSTOMER BEHAVIOR**

- Concern for data and privacy
- Mindful of sustainability
- Need for human element
- Minimalism
- Conscious of corporate values
- Rise of singles and loners

**EXPECTED TO CONTINUE AS IS**

- Multi-channel engagement
- Healthy living
- Shift in purchase decision maker
- Convenience on the rise
- Need for personalized experience
- Interaction and influence
- Shop as per latest trends

**COULD GO UP OR DOWN—WILD CARD**

- Rent or own
- Shift towards experiences
- Brand affinity

**DISRUPTIONS IN OPERATIONS**

- Low-cost operating model
- Alliances and ecosystems
- Smaller store format
- Leveraging gig workers economy
- Viable space productivity
- Private labels
- Cost structure impact due to a mix of gig vs permanent workers

Emerging preferences based on trends in mature geographies

- Concern for data and privacy
- Mindful of sustainability
- Need for human element
- Minimalism
- Conscious of corporate values
- Rise of singles and loners

Racing towards the next wave of Retail in India
Chapter 03: Key imperatives for Indian retailers to succeed

**EMERGING BUSINESS MODELS**

+ Social commerce
+ Evolution of product as a service model
+ Cross-industry play
+ Financial institutions
+ Rise of the D2C sector in India
+ With data at center, retailers can go beyond traditional products

**TECHNOLOGY DISRUPTIONS**

+ Digital consumer journeys
+ AI and VR at scale
+ Digital supply chain
+ ONDC\(^1\) implementation in India
+ Automation of operations using robotics
+ Technology driven staff enablement

**POLICY & REGULATION LANDSCAPE**

+ FDI in multi-brand retail
+ Revised minimum wage laws
+ Gig formalization
+ Data and privacy protection laws
+ Tariffs/local sourcing/GST

---

1. ONDC: Open Network for Digital Commerce
Select factors have the potential to truly disrupt the landscape

**01**
What is impact of ONDC to truly democratize retail

By enabling interoperability across networks, ONDC provides single protocol for ecosystem of retailer and consumers to transact

Buyers have access to large number of retailers – more choices and better price discovery

Create a level playing field for retailers – higher discoverability and more growth opportunity

Accelerate digital commerce adoption

**02**
How can retailers leverage core consumer data to create offerings beyond retail?

Retailers have access to a large volume of consumer data from their buying patterns, buying preferences to transaction mode

Potential to leverage the core data to create a layer of services which are beyond retail

For instance, using buying preferences data to sell financial services viz loans, insurances, etc.

**03**
Which supply side innovations will unlock value for retailers?

Potential for many supply side innovation like alliances and ecosystems, smaller store formats, private label and leveraging gig likely to gain significance

Nature of these alliances could vary from the past, considering the advent of data / technology, fintech, social media giants

B2C retailers starting smaller store formats to provide convenience/ ease of access

Exploring gig labour for physical retailers with high variability in footfall

1. ONDC: Open Network for Digital Commerce
As these factors play out, **retailers will need to make strategic choices**.

**Core Consumer Proposition**

- Target Segments
- Product Range, Price, Quality, Design, Service
- Brand Promise

(Factoring Lens of Business Economics)

**STRONG INTERPLAY BASED ON CHOICES MADE**

- Channel
- Store Concept
- Cost Model
- Value-Chain GTM
- Organization, Alliances
- Data & Technology

Chapter 03: Key imperatives for Indian retailers to succeed
These will **pave the way for select themes** that could gain prominence

Retailers would need to make business model innovations on value proposition and operating model

### CORE CONSUMER PROPOSITION

Chapter 03: Key imperatives for Indian retailers to succeed

Level of maturity with sufficient scale currently observed in India

High

Alliances & Ecosystems: Collaboration is Key
Help increase ecosystem reach by entering partnerships with the unorganized

High-Tech: Data-Driven Focus
Automation, AI, Predictive-Tech, Digital Supply, Voice-Tech

Gig: Gig Labour
Gig Platforms — Flexible Labour (Day, Time & Week)

Multi-Channel: Omnipresence
Presence in both physical & offline channels, drive accessibility

Many India(s): Regional Play
Basis needs, preferences of regions for improving local play

No Frill: Cost Excellence
Low Costs, Private Labels, Minimal Shopping Experience

Low
There are a set of **critical imperatives** for retailers to follow

1. **Build own unique portfolio / platform** - invest in models that work, divest where needed
2. **Improve customer experience**, personally connect with customers, focus on customer relationship versus product leadership alone
3. **Develop destination products / experiences**, the more differentiated the better
4. **Look out for partners**, alliances help to maximise resources, capabilities, play to own strengths
Chapter 03: Key imperatives for Indian retailers to succeed

05 Attract best talent with new and unique capabilities

06 Build cost-efficient and technology enabled retail operations, essential ingredient to success

07 Speed organization, be on the look-out to evolve retail model to stay relevant with emerging trends

08 Apply a test-and-learn approach, consider when and how to scale aligned with goals
While our resilience was put to test, some of the retailers are emerging stronger rather than weaker following the unprecedented pandemic.

Today, being just a retailer isn’t enough, as disintermediation is a real risk. At the same time, the rise of common digital platforms is an interesting trend that allows retailers to gain disproportionate access to a large consumer base. Given the backdrop, control over key aspects of the value chain and engaging directly with customers is an imperative.

Key to win in these uncertain times is an unwavering focus on business fundamentals and disciplined execution. Three top priorities for me include strengthening direct to consumer, building scale and delivering the brand promise consistently.

Venkatesalu P
CEO & Executive Director, Trent Ltd.

We believe the next tier towns hold great potential for future growth for retailers. People in these cities are increasingly becoming more and more aware of quality products & brands, something we are looking to capitalise on. Beyond this, we believe E-commerce, Omni-retail and consumer analytics are among the trends that are seeing large adoption and will drive business forward.

Lalit Agarwal
Founder & MD, V-Mart Retail Ltd.
Consumption in India is going through tectonic shift in terms of channel choices, instant gratification options through quick commerce and evolving consumer brand preferences with focus on health consciousness. Further, Retail is increasingly becoming omnichannel, with businesses integrating both online and offline channels to create differentiation. What’s most important is that businesses need to keep consumers at the core of all decision-making and those business models, which don’t lose sight of the consumers, will win eventually.

Devendra Chawla
MD & CEO, Spencer’s Retail & Nature’s Basket

Hybridized "new retail" is the future as it blends elements of experiential brick and convenience of click. The lines between traditional and online retail will blur as retailers will pivot between brick and mortar and online sales. This naturally increases the customer base and your ability to sweat your assets. A growing culture of immediacy is unstoppable as the industry faces a new trend: impatient customers. Consumers increasingly want instant results and retailers need to respond to this. Personalization and arguably hyper-personalization is increasingly important. Retailers need to speak with consumers in a relevant manner to stay relevant as consumers become more and more time starved.

Mohit Kampani
CEO, More Retail Ltd.
