## Four scenarios of the crisis are simulated along Flatten-Fight-Future

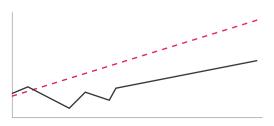

### 2 Most likely I

### 4 Pessimistic

#### **ARCHETYPE**

V-shape

V skewed to a U

U-shape

W-shape skewed to an L

#### **MACROECONOMIC**

Positive surprise in virus properties

Rapid catch-up in mitigation measures and their effectiveness

Significant monetary and fiscal response

Household and business spending stays largely in tact

Few businesses fail, unemployment recovers from initial dip

Virus properties stay or worsen

Mitigation efforts are slow / unsuccessful and have to be extended

Household & business confidence falls & remains depressed (08/09 crisis)

Rebound through governmental support in investments, business sector and households

Virus properties linger with continued fear of mutation

3 Most likely II

Mitigation efforts are intense, yet ultimately unsuccessful

Heightened incidents as economies reopen necessitate new shutdowns

Household & business confidence remains depressed

Financial system begins to show cracks

Occurrence of 2nd wave with severe global impact

Repeated shocks on regional/local level lead to frequent lockdowns

Severe depression of household & business confidence

Severe implications on labor, capital and productivity of the economy

Economy increasingly embraces remote working

#### **AUTO**

Government backed incentives and cheap credit spur quick recovery

Deferred automotive demand recovered

Confidence slowly increasing, supported by government incentives

Demand partly recovered, yet significant portion of sales lost in '20

New vehicle sales remain depressed as market moves into prolonged economic downturn

Significant portion of sales lost

Auto supply chains severely disrupted

Continued shutdowns e.g., plants, dealers

Lingering change to consumer mobility patterns; Immense loss of sales
